Firmware Version: 2.02.000
Boot Code Version: 1.00b12
Nuclias Portal Version: 2.1.2
Published: Nov. 28, 2019

These release notes include important information about D-Link Nuclias Access Point firmware revisions. Please verify that these release notes are correct for your Access Point:

Content:

Revision History and System Requirement:

Firmware Version	Date	Model	Hardware Version	Remark
2.02.000	28-Nov.-2019	DBA-1510P	A1	Official release
2.01.010	30-Oct.-2019	DBA-1510P	A1	Official release
2.01.008	05-July-2019	DBA-1510P	A1	Special approve

Upgrade Instructions:

When the device added to Nuclias portal, the Nuclias portal will automatically update the Access Point firmware to the latest version. User can go to SETTINGS→Firmware → ACCESS POINT UPGRADE to change the firmware upgrade policy and there are three options:

New Features:

Firmware Version	New Features
2.02.000	1. Renew *.redirect.nuclias.com certificate
2.01.008	First release

Changes of Command Line Interface:

The section below only shows command line changes that may bring backward compatibility issues with configuration settings for previous version of firmware.
Any new feature commands that do not have backward compatibility issues are not included in the below section.

Firmware Version	Changes
2.01.010	1. Fixed CLI command firmware-upgrade can't work. 2. Fixed CLI value of static-gateway always show "Null input!!".
2.01.008	First Release

Problem Fixed:

Firmware Version	Problems Fixed
2.01.010	1. Fixed an issue with "In 5G AC mode, the air packet beacon about the Short GI value in VHT capability field always display "supported"." 2. Fixed social login button can't work with iPhone iOS 12.3.1. 3. Fixed that when the character length of the URL for redirection is 242, the client displays the blank page. 4. Fixed an issue with "Should not add secondary DNS automatically after add primary DNS via CLI." 5. Fixed the mobile devices show "incorrect password" while connected to AP. (DUSA20190724000003)
2.01.008	First Release

* D-Link tracking number is enclosed in ()

Known Issues:

Firmware Version	Issues	Workaround

V2.01.008	1. Wireless performance at small packets size does not meet theoretical throughput caused by CPU maximum forwarding rate reached. (DBG18050157) 2. Cannot see the private policy and term of use in google social login via laptop (DBG19040102)
